

DEPUTATION IN WRITING

SPECIAL REGIONAL COUNCIL
DECEMBER 22, 2020

Subject: Motion to move York Region out of grey zone

Spokesperson: Rachel Knight

Name of Group or person(s) being represented (if applicable):

Brief summary of issue or purpose of deputation: (Deputation in Writing)

This lockdown is based on faulty PCR tests and unfairly puts undue hardship on small businesses and the people that depend on these businesses to earn a living. We all know that Christmas is the time of year when many businesses rely on a certain amount of sales. This is ludicrous and it's beyond my comprehension as to why you are not standing up to this. These measures are HURTING your constituents on many levels and are clearly unjustified. I do not agree with how things are being handled. This virus has an extremely high survival rate and mainly affects the elderly, like any other viruses and illnesses do. Things have gotten way out of hand and the government overreach is completely unnecessary. One can't help but wonder if something else is going on.

The mainstream media is fear mongering through sensationalism and are pushing biases. Surely you can see this by now. It is your responsibility to exercise due diligence by doing your own research. I encourage you to research credible, independent doctors who are not being paid by big pharmaceutical companies who stand to profit. Doctors all over the world are speaking out about lockdowns and the collateral damage the ensues. I urge you to listen to them. Please do the right thing and request the Province to take York Region out of lockdown.

Thank you.

Rachel Knight
