# YORK REGION'S ECONOMY CONTINUES TO CREATE JOBS

# 2019 HIGHLIGHTS

## EMPLOYMENT & ECONOMY

The broad shutdown of global economic activity has dramatically impacted the Canadian, Ontario and York Region economies.

Canada lost over one million jobs in March alone, the largest monthly employment decline ever, with Ontario's share a 403,000 job decline.

Especially hard hit sectors of the economy include transportation services, food and accommodation services, and recreation and cultural services. In York Region, these industries alone represent approximately 24% of all businesses and 125,000 jobs, based on data from the 2019 York Region Employment Survey.

Although a level of uncertainty remains, the economic impact is considered to be temporary, as consumer spending is expected to rebound in 2021 when the economy is anticipated to return to a more normal state.

Prior to the coronavirus impacting economic growth in early 2020, signs of a slowing economy were appearing between 2018 and 2019.

The U.S. economy saw a decline from 2.9% in 2018 to 2.3% in 2019, while the Canadian economy decreased from 2.1% to 1.6% and Ontario decreased from 2.2% to 1.6%.

## GLOBAL ECONOMIC GROWTH WILL BE IMPACTED BY COVID-19 IN 2020

### KEY EXTERNAL FACTORS INFLUENCING GROWTH OF THE CANADIAN, ONTARIO, AND YORK REGION ECONOMIES

- U.S. economy (largest market for York Region businesses that export)
- Oil prices
- Value of the Canadian dollar

The U.S. federal reserve lowered interest rates in 2019 to 1.75%. Rates are anticipated to be reduced to historic lows in 2020 to provide assistance for the economic recovery from the coronavirus.

The Bank of Canada lowered interest rates to 1.75% in 2019 and to 0.75% in March 2020, with even further reductions anticipated in 2020.

- COVID-19 has led to a broad shutdown of economic activity that is virtually without precedence as businesses close down, workers stay home and travel bans are put in place
- The length of the downturn in economic growth depends on how quickly health authorities can manage the spread of COVID-19 and how long the shutdown of consumer and business activities continues
- Prior to the coronavirus impacting growth, the International Monetary Fund (IMF) had called for global growth to increase in 2020 and 2021 over 2019 levels. Now almost every country across the globe will experience a recession in 2020
- Canada recorded GDP growth of 1.6% in 2019, lower than the 2.1% recorded in 2018, but will likely decline by 6.2% in 2020 according to the IMF. Ontario is forecasting to decline by 7.1% according to TD Economics.

## THERE IS A STRONG TRADE RELATIONSHIP BETWEEN CANADA AND THE U.S.

Regional businesses directly benefit from increased trade activity.

A lower Canadian dollar promotes exports with the U.S. but impacts the import of U.S. goods and services.

The USMCA deal should increase export prospects for Ontario and York Region businesses.

## HOME SALES REFLECT CONFIDENCE IN THE U.S. ECONOMY

And can increase demand for Canadian goods such as raw building materials and manufactured products.

- U.S. job numbers increased to 161.9 million, adding over 2 million jobs in 2019, while Canadian jobs increased by 320,000 during 2019 to 19.1 million (Figure 1.2)
- The negative impact of COVID-19 on jobs and the overall economy in both the U.S. and Canada started in early 2020, where Canada recorded approximately 3 million lost jobs up to April and the U.S. recorded 15 million lost jobs

## ONTARIO GDP GROWTH

Ontario's economy increased by 2.2% in 2019.

## TOTAL ONTARIO EMPLOYMENT

In 2019, Statistics Canada recorded Ontario employment growth of 1.1% (78,000 jobs) compared to 1.1% in 2018, to reach a total of 7,300,500 jobs.

## ACTIVITY RATE

The activity rate compares the ratio of total employment to total population. One of York Region's Official Plan (ROP) objectives is to create high quality employment opportunities for residents, with a goal of 1 job for every 2 residents.

An activity rate of 50% is consistent with the ROP target.

York Region's activity rate has been increasing since 2010, as shown on Figure 1.5, and is currently 54.4%.

## ECONOMIC ACTIVITY IN ONTARIO, THE TORONTO CMA AND YORK REGION

- The provincial unemployment rate decreased steadily from 6.4% in 2014 down to 4.6% in 2019
- The unemployment rate in the Toronto Census Metropolitan Area (CMA) also decreased from 7.3% in 2014 to 5.4% in 2019
- York Region's unemployment rate was 4.4% at year-end 2019, lower than both the Toronto CMA and Ontario rates
- Due to COVID-19, as of April 2020, the Toronto CMA unemployment rate increased to 7.9%, while Ontario and Canada's increased to 11.3% and 13% respectively

## ONTARIO MIGRATION PLAYS A LARGE PART IN GTHA AND GGH REGION POPULATION GROWTH

- Ontario attracts the highest share of immigrants annually compared to any other province, typically in the 40 to 50% range
- Ministry of Finance forecasts to 2041 indicate the GTHA, Simcoe County and Ottawa region are projected to experience significant population growth of over 35%, while other areas of the province are forecast to either remain stable or record a decline in population
- Population growth in the 905 area between 2011 and 2019 has been slower than the Growth Plan forecast by approximately 10%
- Toronto has captured a higher than expected share of population growth between 2011 and 2019 (35%) when compared to the Provincial Growth Plan forecasts (26%)

# POPULATION GROWTH

**FIGURE 2.3: NET INTRA-PROVINCIAL MIGRATION WITHIN THE GREATER GOLDEN HORSESHOE 2006-2019**

- Since the 2008 recession, there has been a continuing decline in net intra-provincial migrants to the GTHA and a net increase in intra-provincial migrants to the rest of the GGH
- While there are many factors that influence where people decide to live, households are likely looking for more affordable housing options outside of the GTHA, which includes York Region

**FIGURE 2.4: COMPONENTS OF POPULATION GROWTH IN YORK REGION 2006-2019**

- Since 2006, levels of net immigration, net inter-provincial migration and net non-permanent residents have remained relatively consistent in York Region. However, net intra-provincial migration has been declining contributing to a lower rate of population growth in the Region
- Data for York Region shows a direct correlation between an increase in people leaving the Region and the average cost of housing (Figure 2.5)
- This annual out flow of people, which has accelerated after 2013, is one explanation why York Region's popula is 80,000 lower than the Provincial Growth Plan population forecasts (Figure 2.5)

## YORK REGION'S CONTRIBUTION TO GTHA GROWTH IS SIGNIFICANT

- In 2019 York Region's share of the GTHA's population growth was 8.5%, compared to 14.9% in 2018

- The proportion of apartment unit dwellings in the Region's housing stock increased from 12% in 2001 to 15% in 2019
- The proportion of apartment unit dwellings is forecasted to be 19% by 2031

## INDUSTRIAL & COMMERCIAL PROPERTY MARKET

- A low Canadian dollar value relative to the U.S. dollar, continuing low interest rates and domestic demand growth from the U.S. economy should help businesses in Ontario to recover after the severe economic slow down caused by the coronavirus
- It is unknown to what extent the coronavirus will impact the global economy. In the long term, the USMCA deal should support positive export prospects for Ontario and York Region businesses

# CONCLUSION

The Growth and Development Review provides a snapshot of key development and population indicators in York Region and reports on the competitiveness of York Region's economy within the Greater Toronto and Hamilton Area (GTHA), the Province and Canada.

In 2019, there were an estimated 654,650 jobs and 1,202,500 residents in the Region.

COVID-19 and social distancing provisions are having a dramatic impact on the global economy. The impact on York Region's economy in 2020 will be severe and it is anticipated that there will be a slow, phased in approach to getting people back to work and regular life, based on the advice of public health and safety professionals. Although a high level of uncertainty remains, the economic impact is considered to be temporary, as consumer spending is expected to rebound in 2021 when the economy is anticipated to return to a more normal state.

York Region is one of Canada's fastest-growing large urban municipalities and is forecast to reach a population of 1.79 million and employment of 900,000 by 2041. The Region is an attractive location to live and invest and is committed to attracting and retaining employers and residents, as well as making significant infrastructure investments to support growth.
