

February 2, 2021

The lockdowns are doing more harm than good. The collateral damage done by lockdowns is far greater than the virus itself. The statistics are out now and small businesses are not the driving force behind the spread of this virus. It's most prevalent in long term care and retirement homes. This is where the government should focus their efforts. Not small business.

Please open up our economy!! We need our small and medium sized businesses!! They are critical!!

Thank you for your time.

Regards

Irma LeBlanc
