

February 2, 2021

Hello,

I recently reached out to Deputy Mayor of Richmond Hill Carmine Perrelli, in regard to his motion to move York Region out of the 'grey zone'.

The fact of the matter is, I have loved ones who have commit suicide/euthenasia or have lost everything due to their business closure. These lockdown measures are not helping anyone from small businesses to mental health and even long-term care homes. The aftermath is much greater than the cause, COVID-19 itself.

Here is an article from the WHO stating that they do not recommend lockdown measures as primary virus control.

Even York Region's Dr Karim Kurji does not recommend these measures. Read the article [here](#).

I thought we were taking recommendations for top doctors and the WHO – why are we ignoring their advice on not locking down? Who's advice are we taking to justify these lockdown measures?

My hopes are that you can be sensible and agree with Carmine Perrelli's motion – we the people are for it.

Thank you,

Alison Phan

Richmond Hill Resident
