**Subject:** Opposition to Item F.2 Updated Draft Regional Official Plan Reflecting October 21, 2021 Council Growth Management Direction

To whom it may concern:

I am sending this email to express my official opposition and displeasure with Item F.2 regarding the growth direction plan that council is tabling. Passing this plan will remove all of our region's Provincially Identified Agricultural Lands (whitebelt) all to promote further development and job creation in an extremely congested region already! Growth predictions and targets are already set for 250K pple in the area by 2051 and this will burden all support systems in communities, traffic, pollution, healthcare etc. We already have plans to increase the population and jobs! This item is being pitched as an item to assist with those plans, and that is something that is misleading to the public!! Please stop this from passing.

A concerned Old Maple resident,
