Regarding York Regional Council meeting, November 25, 2021, Item F.2, please recognize **my strong opposition** to developing the whitebelt agricultural lands. We have many areas within our urban landscape where infill development is possible and preferred as opposed to sprawling out further into agricultural lands.

I would hope that developers can understand the importance of protecting our lands especially in light of the catastrophic events we are now witnessing in real time due to our negligence of climate change.

I appreciate your understanding in these unprecedented times.
