<sup>1</sup>Kilometres are not an accurate representation of use since ambulances are required to idle for patient care. Average idle time on a decommissioned ambulance is 2,800 hours which equates to 148,400 kilometres of wear and tear on the vehicle according to the original equipment manufacturer.

<sup>2</sup>Paramedic Services is under contract with Demers, Ambulance Manufacturer Inc. and the contract includes the ability to trade-in decommissioned ambulances. Trade-in provided values are higher than historical net proceeds from auction.

<sup>3</sup>Ambulances were decommissioned in accordance with Paramedic and Seniors Services annual approved capital replacement plan for vehicles. The decision to replace a vehicle is based on an analysis of vehicle age, engine hours, mileage, repair and maintenance costs and fuel efficiency. This analysis determines if the ambulance can continued to be maintained or traded in.
