MEMORANDUM

To: Members of Committee of the Whole

From: Paul Freeman
Chief Planner

Date: May 18, 2022

Re: Draft Regional Official Plan Consultation Update and Statutory Public Meeting – Attachment 1 Corrections

Attachment 1 to the ROP report is being revised to correct inaccuracies and will be provided to Council on May 26, 2022

Attachment 1 to the [Draft Regional Official Plan Consultation Update and Statutory Public Meeting](#) report provides a summary of detailed submissions on the Draft ROP and a response to comments. Inaccuracies in Attachment 1 were discovered due to an error that occurred while managing data required for the table. The inaccuracies were primarily in the final 'response' column of the table. Local Municipal MCR working group partners, comprised of Provincial and local municipal planners, were made aware of the matter.

Corrections to the final column of Attachment 1 are being made to confirm accuracy, and a revised Attachment 1 will be provided on the May 26, 2022 Council agenda. In the interim, Attachment 1 originally posted on York.ca has been replaced with a revised version that removes the inaccurate content and refers the reader to the [track change version of the Draft ROP](#) for policy related comments.

Mapping related comments in Attachment 1 have been confirmed as accurate except for the four comments noted below that have been updated with minor corrections in the response column. With these updates, the revised table provides recommendations being made with respect to mapping comments, including appendices.

1. ID# 1048 – No change – adequately addressed with existing content
2. ID# 1072 – No change – request requires additional assessment and should be addressed through next MCR

3. ID# 1077 – No change – adequately addressed with existing content
4. ID# 1079 - Acknowledged – to be addressed through implementation and/or implementation plans

The May 2022 track changes version of the draft York Region Official Plan provides an accurate reflection of recommended changes

Until changes to the 'response' column of Attachment 1 have been made and provided to Council, the [track changes version](#) of the draft ROP does reflect the recommended landing point on policy changes to the ROP and should be consulted to determine if comments on the Draft ROP resulted in a recommended change and the nature of the change.
